

# Leaf Rubbings

Looking at leaves can be a great way to learn about nature and discover what plants are in the area. Using these leaves to make leaf rubbings is a great way to learn and have fun!

Materials Needed:

- leaves... collected on your Great Park Pursuit adventures!
- paper
- crayons or colored pencils

Step #1:

Head outside to your background, a local park or a state park area. Collect leaves along the way from all different kinds of trees.

Step #2:

Place a leaf under the piece of paper.

Step #3:

Using the crayons or colored pencils, rub the paper over the leaf. The vein pattern from the leaf will be transferred to the paper. Enjoy!
