Results Key:

Detected=initial reactor on ELISA test; confirmed CWD positive result via immunohistochemistry (IHC) testing

Not Detected=CWD negative result

Inconclusive=tissues other than lymph node submitted which were initial reactors on ELISA test, but cannot be confirmed as a positive result

Insufficient Sample=could not be tested due to inadequate sample

IR Unverified=sample was an initial reactor on ELISA test, but could not be confirmed as CWD positive via IHC testing due to sample size
