Nebraska Conservation and Environmental Review Tool (CERT): How to Create a Project Boundary

Nebraska Natural Heritage Program Nebraska Game and Parks Commission March 24, 2021

The Nebraska CERT analyzes information for the project location that you provide. There are several ways to create your project boundary. Below are step-by-step instructions for each method.

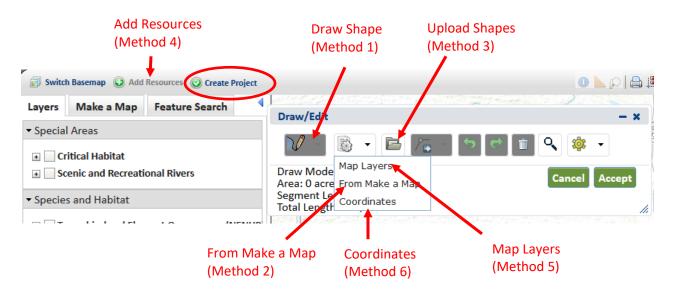

Contents

Overview of tools used to create project boundary	2
Method 1: Create Project Boundary using the Draw tool in the Draw/Edit Toolbar	2
Method 2: Create Project Boundary from the 'Make a Map' tab	4
Method 3: Create Project Boundary using a Shape from a Shapefile Added After Beginning to Create Project	. 7
Method 4: Create Project Boundary using a Shape from a Shapefile/Geodatabase Added via 'Add Resources' Before Beginning to Create Project	. 9
Method 5: Create Project Boundary using a Shape from a Map Layer 1	13
Method 6: Create Project Boundary from Coordinates 1	15

Overview of tools used to create project boundary

With one exception all the tools you can use to create a project boundary are accessible from the **Draw/Edit Toolbar**, which appears when you click on **Create Project**.

The exception is that if you want to use a feature from a <u>geodatabase</u> you must upload it to the Map using the **Add Resources** button, before clicking the **Create Project** button.

Method 1: Create Project Boundary using the Draw tool in the Draw/Edit Toolbar

Note: To use this method, you must be zoomed to a scale of 1:72,224 or finer. For creating a project boundary at coarser scales, use any of the other methods.

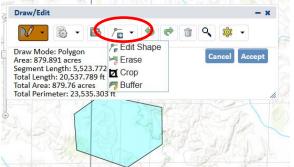

Start on the **Map** tab. Click on the **Create Project** button. This brings up the **Draw/E**dit toolbar. Zoom in if necessary to the area of your project.

NEBRASKA Conservation	Draw/Edit	- ×

Home Map My Projects My Subscription	Cancel Zoom in closer than 1:72,224 to draw your project. Alternately	, you may
Layers Make a Map Feature Search 01	upload a zipped ESRI shapefile or use additional mapping optic scale.	ons at any

Click the **Draw** dropdown menu and choose the **Draw Polygon** tool. Note that you could also choose to draw a line or point at this point instead.

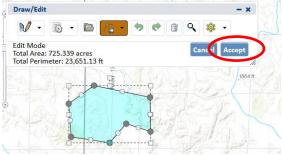

Create vertices by clicking the mouse on the map. Double-click to complete the polygon. If you need to edit the polygon, use the tools available from the **Edit Shape** drop-down menu:

(See the User Guide to accounts and map features on the Nebraska CERT Help page for more details on editing tools.)

Once you have finished drawing/editing your polygon, click Accept:

That will bring up the **Create Project** screen:

Create	Project
P	Fields marked with red asterisks are required fields. Project Title * Inter a descriptive and brief title for this project.

S	Project Type * lelect only one Project Type per project Agriculture
	Communications

Nebraska CERT – Create Project Boundary

Method 2: Create Project Boundary from the 'Make a Map' tab

The Make a Map tab lets you draw polygons at any scale.

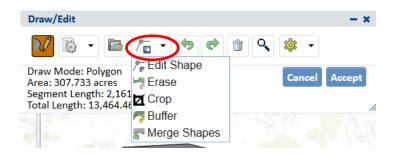

Click on the Make a Map tab and click Add:

Home 🚽	Мар	My Projects	My Subscription	Terms & Conditions	-	Help	Resources	
Switch Basen	nap 🥥 A	dd Resources 🥥	Create Project					
Layers Mal	ke a Mag	Feature Se	arch	0		No.	889	0th Rd
Drawing Type:	Polyg	jons 🗸	Add		N.C.

13 19626		
is a color		
901078		

Double-click to complete the polygon. If you need to edit the shape, use the tools available from the **Edit Shape** drop-down menu:

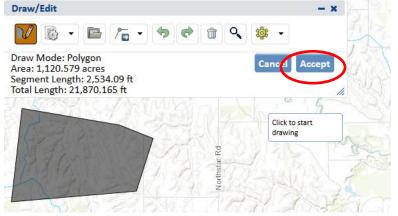

The Edit Shape tool (first one in drop-down menu) lets you edit individual vertices.

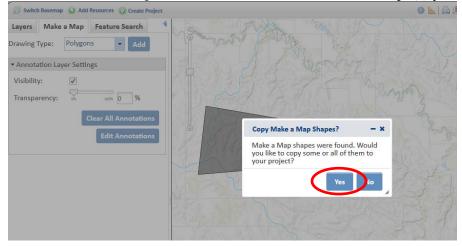

(See the User Guide to accounts and map features on the Nebraska CERT Help page for more details on editing tools.)

When finished drawing/editing your polygon, click **Accept** to close the **Draw/Edit** window.

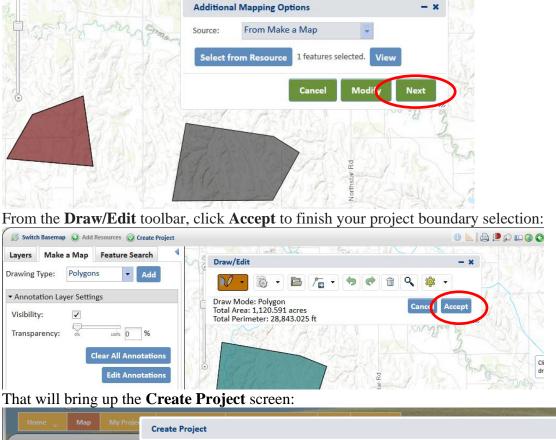

Click the **Create Project** button and click **Yes** to use the shape(s) you created:

The Details window shows the map shape(s) found. Note that if multiple shapes are found, you can optionally remove one or more from being used in the analysis using the **Show Table** drop-down option **Remove from Include List:**

Once you have the shape(s) you want to use, close the **Details** window. The **Additional Mapping Options** dialog box will be displayed. Click **Next**:

This brings up the **Create Project** screen:

Method 4: Create Project Boundary using a Shape from a Shapefile/Geodatabase Added via 'Add Resources' Before Beginning to Create Project

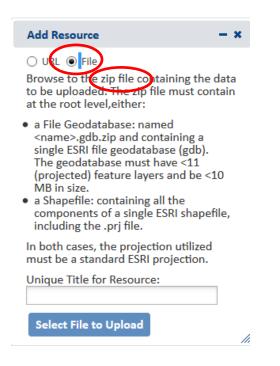

Start on the Map tab. Click Add Resources to bring up the Add Resource dialog box:

NEB - GAME	RAS	KA ^{(s –}			Add Resource © URL O File URL of Map-or Feature Service to Ad:	-
Home	Мар	My Projects	My Subscription	Terms & C		
🗊 Switch Ba	semap 🥥 Ad	dd Resources 🥥	Create Project		Unique Title for Resource:	
ayers N	/lake a Map	Feature Se	arch	I SCALA		

Click the **File** radio button. Navigate to and select the zipfile containing the data to upload.

You can choose a zipped shapefile to upload or a feature class (or classes) from a zipped file geodatabase (with restrictions on size and number of feature classes).

In both cases data must be projected, i.e. data in units of degrees are not compatible with the system.

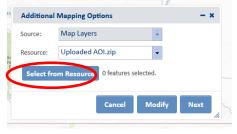

The **Table of Contents** now shows the layer under **Added Resources**. Close the **Add Resource** dialog box. Click **Create Project** to bring up the **Draw/Edit** dialog box:

0		J	01			0

Method 5: Create Project Boundary using a Shape from a Map Layer

Below are the steps to enter a project as a polygon from a map layer already included in the site.

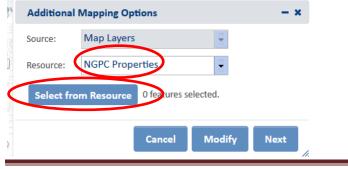

Turn the layer on by placing a checkmark in the box next to it. In this example, NGPC Properties are used. Click the **Create Project** button.

NEBRASKA - GAME PARKS -					the context of the second		
Home Map My Projects	My Subscription	Terms & Conditions	Help	Resources			
Switch Basemap 🕥 Add Resource 🕥 C	reate Project					B 🖻 💷 🎯	OOF

7.4)	1 1 1 1 1	Cancel		
	ا ۲.5	Cancel		

This will bring up the **Draw/Edit** window. If you wanted, at this point you could select another shape from the same map layer, or from a different layer, using the same method as above (results will let you combine multiple shapes into one project boundary). Click **Accept** to finish your project boundary selection:

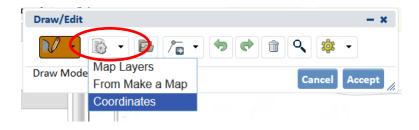

That will bring up the **Create Project** screen:
