Southeast District, Fisheries Division

Nebraska Game and Parks Commission

In January 2025, NGPC district biologists repurposed scrap concrete from recent parking lot and boat ramp enhancements at Wildwood WMA to create rock piles across the lake. Below is an overview of the project, including photos, map locations of the structures, and GIS coordinates for their placement. (Please note that the rock shoal coordinates are approximate and serve as general guides, as the rock may shift during ice thaw.)
