

Zorinsky Brushing Project Update

Jehnsen Lebsock, Aaron Blank, Jake Werner, Matthew Perrion

Southeast District, Fisheries Division

Nebraska Game and Parks Commission

As part of an Eagle Scout project, John Karnett constructed 24 artificial habitat structures to be placed in a local Omaha reservoir. In April of 2024, they were placed in Zorinsky Lake by John with the help of NGPC district biologists and a local Conservation Officer. Below is an overview of the project including pictures from the project, map locations of the structures, and GIS coordinates where structures were placed. (Coordinates are an estimate and give a good reference of where to generally find these structures). Thanks John for the work constructing these structures that will greatly benefit Nebraska anglers.

Latitude	Longitude	Structure
41.22071	-96.1748	Artificial
41.22069	-96.1748	Artificial
41.22066	-96.1747	Artificial
