February 2025

Cedar trees were added in 2008, 2009, and 2014 as part of an Aquatic Habitat Project. In 2008, approximately 20-25 fishing structures were added; in 2009, 45 structures were added; and in 2014, 55-60 structures were added at Grove Lake. Below is an overview of the project, including the map locations of the structures. (Please note that the structure coordinates are approximate and serve as general guides, as the structures may shift.)
